DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Elected claims 1, 4, 6, 14, 21, 23, 25, 32, 40-42, and 50-52, drawn to a nozzle for ultrasound wound treatment, classified in class 604, subclass 22.
 - II. Elected claims 44-46, 56, and 58, drawn to a method for treating a wound, classified in class 604, subclass 500.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II. and I. are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus or by hand with at least two different apparatus that constitute the process as recited. One apparatus could be an ultrasonic device independent of the fluid delivery device. The second piece would be a fluid delivery device such as a spray bottle whereby the ultrasonic energy would be delivered by emission of energy to the wound through the spray.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
